SUMMARY

AI applications engineer with 5+ years building production software across Python, TypeScript, FastAPI, Next.js, Supabase/Postgres, and cloud delivery. Built GenAI / LLM workflows, AI-assisted research systems, response validation, MCP automation tools, SaaS platforms, data pipelines, and test-heavy API products. Strong fit for teams shipping practical AI features into business workflows: agents, copilots, RAG-style knowledge systems, prompt engineering, eval gates, integrations, observability, security, and production reliability.

TECHNICAL SKILLS

AI Engineering: GenAI, LLMs, OpenAI, Anthropic/Claude, multi-provider AI, structured outputs, tool calling, MCP, agents, RAG, prompt engineering, response validation, eval harnesses, prompt regression, hallucination detection

Languages: Python, TypeScript, JavaScript, C#/.NET, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, responsive UI, dashboards

Backend: FastAPI, ASP.NET Core, Node.js, REST APIs, WebSocket, SignalR

Data/ML: PostgreSQL, Supabase, SQLite, Redis, pandas, scikit-learn, XGBoost, LightGBM, data pipelines, model training/evaluation, machine learning basics

Cloud/DevOps: Vercel, AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Git

Quality: pytest, Playwright, API testing, E2E testing, contract tests, load testing, secret scanning, dependency audits

Integrations: Stripe, OAuth, JWT, Discord API, Claude API, OpenAI/GPT APIs

PROFESSIONAL EXPERIENCE

AI Applications Engineer / Founder & Lead Developer | Nexural

2024-Present | Remote

- Built Nexural Research, an AI-assisted strategy analysis platform with 3 AI providers, metric-grounded response validation, 58 FastAPI endpoints, 604 tests, 93% coverage, Docker/Kubernetes deployment, and 71+ analytical metrics.
- Built Nexural Automation, a local-first MCP automation lab with 8 stable tools, strategy/bridge SDKs, contract tests, secret scanning, CI quality gates, and agent-callable workflows.
- Designed AI analysis workflows that ground model responses in deterministic metrics, cross-reference claims against source data, and expose confidence scoring before user-facing recommendations; used prompt engineering and eval harnesses to reduce hallucinated output.
- Built AlphaStream ML signals with XGBoost, LightGBM, Random Forest, model training/evaluation workflows, walk-forward validation, zero-leakage checks, futures cost modeling, and production-oriented research gates.
- Built and deployed production Next.js applications on Vercel with GitHub Actions-backed deployments, serverless Node.js functions, Turbopack builds, Supabase/Postgres, Stripe, auth, RLS, Playwright E2E tests, and production observability.
- Shipped Sage Ideas Studio, a full-stack operating platform with 105 routes, 57 API endpoints, 38 database tables, auth, RLS, audit logs, e-signature, billing, admin workflows, and client portal features.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Built React/Next.js dashboards and backend APIs for production fintech workflows spanning market data, research, subscriber usage, trade data ingestion, user subscriptions, and Stripe billing automation.
- Led investment research and full-stack development in a 14-person remote fintech team, translating financial workflows into production software, internal tooling, reports, and user-facing dashboards.
- Authored 200+ pages of investment analysis, financial reports, technical documentation, and user-facing research explainers.
- Collaborated in Agile sprints using Git PRs, code reviews, Jira, Slack, async communication, and cross-functional delivery with product, research, and executive stakeholders.

Project Manager & General Contractor | Sage Ideas LLC

2016-2021 | Central Florida

- Managed client-facing residential projects from estimate through delivery, coordinating subcontractors, timelines, budgets, customer communication, issue resolution, and sign-off.
- Built operational discipline in scope control, stakeholder communication, project delivery, and customer-facing execution.

SELECTED PROJECTS

- Nexural Research:** AI-assisted analysis engine with FastAPI, 58 endpoints, 604 tests, 93% coverage, 3 AI providers, response validation, Docker/Kubernetes.
- Nexural Automation:** MCP server, 8 stable tools, Strategy SDK, Bridge SDK, contract tests, CI quality gates, local-first automation workflows.
- Sage Ideas Studio:** Production Next.js/Supabase/Stripe app with 105 routes, 57 APIs, 38 tables, auth, RLS, audit logs, E2E tests, Vercel deployments.
- Trade Engine:** Event-driven order execution engine with state machines, risk checks, event sourcing, position tracking, and tests.

EDUCATION

- B.S. Computer Science | Full Sail University
- B.S. Finance | Kean University

CERTIFICATIONS

- ISTQB CTFL | ISTQB Test Automation Engineer | ISTQB CT-AI
- AWS Cloud Practitioner | AWS Solutions Architect | AWS ML Foundations | Cisco Networking
