

Jason Teixeira

AI Data Annotation Specialist | LLM Evaluation, Rubric Scoring, Quality Review
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

AI evaluation and data-quality specialist with experience reviewing AI-generated outputs, validating claims against source data, writing detailed technical analysis, and applying structured quality criteria. Strong fit for LLM evaluator, AI data annotator, AI response reviewer, model-ranking, rubric-scoring, and human-feedback roles.

TECHNICAL SKILLS

AI Evaluation: LLM evaluation, AI response evaluation, rubric scoring, model ranking, hallucination detection, prompt evaluation, groundedness checks, source attribution

Data Quality: data annotation, labeling, taxonomy, quality assurance, consistency checks, error analysis, validation workflows

Writing/Analysis: technical writing, financial research, documentation, comparative analysis, user-facing explanations

Tools: Python, SQL, Excel, GitHub, browser research, Markdown, CSV review, issue tracking

Domains: finance, trading systems, SaaS workflows, APIs, software QA, AI tools

EXPERIENCE

AI Response Evaluator / Developer | Nexural

2024-Present | Remote

- Reviewed AI-generated strategy analysis against deterministic source metrics, confidence scores, and system-provided context before user-facing recommendations.
- Designed response validation workflows for multi-provider LLM outputs, including claim checking, metric grounding, hallucination detection, and quality review.
- Built AI-assisted analysis flows using OpenAI, Claude, structured outputs, tool-calling concepts, prompt evaluation, and regression-style quality checks.
- Created documentation, implementation notes, test cases, and expected-output criteria for AI automation tools and research workflows.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Authored 200+ pages of financial analysis, market commentary, technical documentation, and user-facing research requiring accuracy, clarity, and evidence review.
 - Reviewed market data, financial claims, charts, reports, and technical explanations for consistency, logic, source alignment, and user comprehension.
 - Collaborated with product, research, and leadership stakeholders to translate complex information into clear outputs.
-

SELECTED PROOF

Nexural Research: multi-provider LLM analysis, response validation, source-grounded metrics, quality gates.

HighStrike Research: 200+ pages of analysis and technical documentation.

Nexural Automation: repeatable tool outputs, schema validation, contract fixtures, quality checks.
