

Jason Teixeira

AI Prompt / Content Evaluator | LLM Review, Rubric Scoring, Quality Analysis
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

AI prompt and content evaluator with experience reviewing LLM outputs, validating claims against source data, writing technical analysis, scoring response quality, and documenting model behavior. Strong fit for AI content quality analyst, prompt evaluator, AI search quality rater, LLM response reviewer, and AI training roles.

SKILLS

AI Review: prompt evaluation, LLM response review, model ranking, rubric scoring, hallucination detection, groundedness checks, source attribution

Content Quality: factual accuracy, clarity, completeness, tone, policy alignment, taxonomy, labeling, annotation, error analysis

Writing: technical writing, financial analysis, user-facing explanations, documentation, comparative evaluation

Technical: OpenAI, Claude, AI workflows, Python basics, SQL basics, Markdown, GitHub, QA process

EXPERIENCE

AI Prompt / Content Evaluator | Nexural

2024-Present | Remote

- Reviewed AI-generated analysis against deterministic source metrics, confidence scores, source context, and expected output quality.
- Designed validation workflows for LLM responses including claim checks, hallucination detection, prompt regression, and source-grounded review.
- Compared model outputs across providers and documented quality differences, failure modes, and improvement opportunities.
- Wrote clear evaluation notes, implementation docs, expected-output criteria, and user-facing technical explanations.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Authored 200+ pages of financial analysis, market commentary, technical documentation, and research reports requiring accuracy and clear judgment.
- Reviewed complex claims, data, charts, and written explanations for logic, consistency, clarity, and reader usefulness.

SELECTED PROOF

Nexural Research: multi-provider LLM analysis, prompt evaluation, hallucination checks, response validation, source-grounded metrics.

HighStrike: 200+ pages of financial analysis and technical explanations with evidence review and clear user-facing writing.

Nexural Automation: repeatable tool outputs, schema validation, expected-output criteria, and quality review workflows.
