

Jason Teixeira

Application Support Analyst | SaaS, APIs, SQL, Troubleshooting, Incident Notes
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

Application support analyst with hands-on experience supporting SaaS applications, dashboards, APIs, auth, billing, data workflows, user issues, and release validation. Strong fit for application support, production support, SaaS support, and technical operations roles requiring troubleshooting, SQL/API familiarity, documentation, escalation, and QA validation.

SKILLS

Application Support: issue reproduction, ticket triage, defect tracking, escalation, root cause analysis, incident notes, release validation

Technical: REST APIs, SQL, PostgreSQL, Supabase, auth/RLS, Stripe, serverless functions, logs, browser dev tools

QA: regression testing, smoke testing, API testing, Playwright, test cases, bug reports, acceptance criteria

Tools: GitHub, Vercel, Jira, CI/CD, Docker basics, documentation, stakeholder communication

EXPERIENCE

Application Support Analyst / Developer | Sage Ideas

2024-Present | Remote

- Supported a production SaaS platform covering auth, billing, e-signature, documents, client portal, admin dashboards, messages, notifications, and audit logs.
- Investigated application issues across frontend screens, API routes, database records, auth policies, Stripe events, and deployment behavior.
- Created bug reports, reproduction steps, troubleshooting notes, release checks, and implementation documentation.
- Validated fixes with API checks, Playwright tests, manual QA, regression checks, and user workflow verification.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Supported fintech application workflows including dashboards, billing, subscriber tools, market data, reporting, and internal operations.
- Translated user and stakeholder issues into requirements, fixes, documentation, and QA checks.

SELECTED PROOF

Sage Ideas Studio: 105 routes, 57 API endpoints, 38 database tables, auth, RLS, Stripe, e-signature, client portal, admin workflows.

Nexural Research: FastAPI application support, AI provider integrations, API validation, reporting/export workflows.

HighStrike: subscriber workflows, billing automation, dashboards, market-data tools, and user-facing research operations.
