

Jason Teixeira

Data Quality Analyst | Data Validation, QA, SQL, Python, Reporting
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

Data quality analyst with finance, QA, software, and reporting experience. Strong fit for data QA, data validation, reporting analyst, operations analyst, and AI data quality roles requiring accuracy, SQL/Python familiarity, documentation, defect tracking, and stakeholder communication.

SKILLS

Data QA: data validation, data cleaning, consistency checks, error analysis, quality assurance, reconciliation, reporting checks

Tools: SQL, PostgreSQL, Supabase, Python, pandas, Excel, CSV workflows, dashboards, GitHub

QA Process: test cases, bug reports, acceptance criteria, regression checks, source validation, documentation

Domains: finance, fintech, SaaS, AI evaluation, market data, reporting, metrics

EXPERIENCE

Data Quality Analyst / Developer | Nexural / Sage Ideas

2024-Present | Remote

- Validated data-heavy workflows across APIs, dashboards, Postgres/Supabase tables, forms, reports, AI outputs, billing records, and user-facing screens.
- Built Nexural Research with 71+ analytical metrics, source-grounded AI validation, FastAPI endpoints, reporting workflows, and deterministic quality checks.
- Checked data consistency across database records, API responses, UI states, reports, and model-facing context.
- Documented data issues, reproduction steps, validation criteria, and expected behavior for fixes.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Authored 200+ pages of financial analysis, reports, market commentary, and technical documentation requiring careful data validation.
- Supported market-data workflows, dashboards, trade data ingestion, subscriber reporting, and billing automation.

SELECTED PROOF

Nexural Research: 71+ analytical metrics, source-grounded AI validation, FastAPI endpoints, data quality checks, reports.

HighStrike: financial reports, market-data validation, subscriber reporting, dashboards, and research quality review.

Sage Ideas Studio: 38 database tables, audit logs, admin dashboards, form validation, billing records, and reporting workflows.
