

Jason Teixeira

Forward-Deployed AI Engineer | LLM Apps, Integrations, Workflow Automation
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | nexural.io | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

Product-minded AI engineer who turns ambiguous workflows into shipped applications. Built full-stack SaaS platforms, GenAI / LLM workflows, RAG-style knowledge systems, AI-assisted analytics, MCP automation tools, APIs, data pipelines, admin dashboards, billing, auth, audit logs, and client-facing delivery systems. Strong fit for teams deploying AI agents and LLM workflows into real business environments with integration, reliability, security, and user adoption constraints.

TECHNICAL SKILLS

AI/Automation: GenAI, LLM workflows, MCP, agents, RAG, prompt engineering, eval harnesses, tool calling, OpenAI, Claude, response validation, workflow automation, human-in-the-loop systems

Product Engineering: discovery, workflow mapping, rapid prototyping, API integration, dashboards, admin tools, client portals, documentation

Stack: Python, TypeScript, React, Next.js, FastAPI, Node.js, C#/.NET, SQL, PostgreSQL, Supabase, Redis, model training/evaluation, Docker, Kubernetes, Vercel, AWS

Delivery: GitHub Actions, CI/CD, Playwright, API testing, E2E testing, audit logs, RLS, Stripe, OAuth, JWT, technical documentation

PROFESSIONAL EXPERIENCE

Forward-Deployed AI Engineer / Founder & Lead Developer | Nexural / Sage Ideas

2024-Present | Remote

- Built an integrated studio operating platform replacing CRM, contract, e-signature, billing, client portal, delivery workflow, time tracking, and audit-log tools with one production Next.js/Supabase/Stripe application.
- Built and deployed production Vercel applications with GitHub Actions-backed deployments, serverless functions, Turbopack builds, Supabase/Postgres, Stripe, auth, RLS, Playwright tests, and production observability.
- Built Nexural Automation, a local-first MCP automation lab with 8 stable tools, strategy and bridge SDKs, paper-first safety gates, cost modeling, contract tests, and agent-callable workflows.
- Built Nexural Research, an AI-assisted analysis engine with multi-provider LLM workflows, RAG-style source grounding, prompt engineering, metric-grounded response validation, 58 FastAPI endpoints, 604 tests, Docker/Kubernetes, and export/report workflows.
- Produced customer-facing documentation, implementation guides, public docs, installation workflows, security hardening notes, and operational runbooks.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Built fintech dashboards, APIs, billing automations, research workflows, and market-data tools for a remote fintech team.
- Translated investment research, market workflows, and subscriber needs into production features, reports, dashboards, documentation, and internal tools.
- Worked directly with leadership and cross-functional teammates to scope, prioritize, ship, review, and iterate on production software.

Project Manager & General Contractor | Sage Ideas LLC

2016-2021 | Central Florida

- Managed client-facing projects with budget, timeline, subcontractor, expectation, and delivery ownership from initial estimate through final sign-off.

SELECTED PROOF

Sage Ideas Studio: 105 routes, 57 API endpoints, 38 database tables, auth, RLS, audit logs, e-signature, Stripe, client portal, Vercel deployments.

Nexural Automation: MCP server, 8 tools, SDKs, paper-first automation, CI gates, docs, secret scanning.

Nexural Research: AI provider integrations, response validation, FastAPI, 604 tests, Docker/Kubernetes.

EDUCATION & CERTIFICATIONS

B.S. Computer Science | Full Sail University

B.S. Finance | Kean University

ISTQB CTFL | ISTQB Test Automation Engineer | ISTQB CT-AI | AWS Cloud Practitioner | AWS Solutions Architect | AWS ML Foundations
