

Jason Teixeira

Full-Stack AI Product Engineer | Next.js, FastAPI, LLM Workflows, SaaS
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | nexural.io | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

Full-stack AI product engineer with 5+ years building production fintech, SaaS, automation, and AI-assisted applications. Strong in Next.js, React, TypeScript, Python, FastAPI, Supabase/Postgres, Stripe, auth, APIs, Vercel deployments, and test-heavy delivery. Builds complete product slices from data model and backend API to frontend workflow, billing, observability, and release gates.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, dashboards, portals, admin workflows

Backend: Python, FastAPI, Node.js, ASP.NET Core, REST APIs, WebSocket, SQL

AI: LLM workflows, OpenAI, Claude, MCP, agents, response validation, RAG-style workflows, eval harnesses

Data: PostgreSQL, Supabase, SQLite, Redis, pandas, scikit-learn, XGBoost, LightGBM

DevOps: Vercel, AWS, Docker, Kubernetes, GitHub Actions, CI/CD, Turbopack

Quality/Security: Playwright, pytest, API tests, RLS, audit logs, OAuth, JWT, secret scanning, dependency audits

PROFESSIONAL EXPERIENCE

Full-Stack AI Product Engineer / Founder & Lead Developer | Sage Ideas / Nexural

2024-Present | Remote

- Built Sage Ideas Studio, a production Next.js/Supabase/Stripe platform with 105 routes, 57 API endpoints, 38 database tables, auth, RLS, audit logs, e-signature, admin workflows, client portal features, and Vercel deployments.
- Built and deployed production Next.js applications on Vercel with GitHub Actions-backed deployments, serverless Node.js functions, Turbopack builds, Playwright tests, Sentry/PostHog-style observability patterns, and CI gates.
- Built Nexural Research, an AI-assisted analysis platform with multi-provider LLM workflows, metric-grounded response validation, 58 FastAPI endpoints, 604 tests, 93% coverage, Docker/Kubernetes deployment, and report exports.
- Built Nexural Automation, a public local-first MCP automation lab with 8 stable tools, strategy/bridge SDKs, contract tests, docs, secret scanning, and quality gates.
- Built Trade Engine, an event-driven order execution engine with state machines, risk management, event sourcing, position tracking, replayable events, and tests.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Built React/Next.js dashboards processing real-time market data across equities and futures for daily subscriber and internal research use.
- Designed backend APIs handling trade data ingestion, user subscriptions, research workflows, and Stripe billing automation.
- Authored 200+ pages of investment analysis, technical documentation, reports, and user-facing education.
- Collaborated across remote Agile workflows with PR reviews, Git, Jira, Slack, and async communication.

PROJECTS

Sage Ideas Studio: Next.js, Supabase, Stripe, auth, RLS, audit logs, E2E tests, Vercel.

Nexural Research: FastAPI, AI providers, response validation, 604 tests, Docker/Kubernetes.

Nexural Automation: MCP tools, SDKs, CI gates, contract tests.

AlphaStream: ML signals, indicators, backtesting, futures research workflows.

Trade Engine: event-driven execution, state machines, risk management, event sourcing.

EDUCATION & CERTIFICATIONS

B.S. Computer Science | Full Sail University

B.S. Finance | Kean University

ISTQB CTFL | ISTQB Test Automation Engineer | ISTQB CT-AI | AWS Cloud Practitioner | AWS Solutions Architect | AWS ML Foundations
