Builds practical product features and validates them with QA and regression checks.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, responsive UI

Backend: Python, FastAPI, Node.js, REST APIs, serverless functions, WebSocket basics

Data: SQL, PostgreSQL, Supabase, SQLite, Redis, data validation

DevOps/Tools: Git, GitHub, Vercel, Docker, GitHub Actions, CI/CD

Testing: Playwright, pytest, API testing, smoke testing, regression testing, bug reports

EXPERIENCE

Full-Stack Developer | Nexural / Sage Ideas

2024-Present | Remote

- Built production Next.js/Supabase/Stripe workflows across auth, billing, e-signature, client portals, admin dashboards, forms, API routes, audit logs, and deployment releases.
- Built FastAPI-backed AI and analytics workflows with REST endpoints, validation logic, response handling, reporting/export flows, and Docker packaging.
- Implemented database-backed features using PostgreSQL/Supabase tables, RLS policies, forms, API routes, admin workflows, and user-facing dashboards.
- Added Playwright and API validation checks to reduce regressions across critical workflows.
- Deployed applications through Vercel and GitHub Actions with CI checks, environment configuration, and release verification.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Built React/Next.js dashboards, backend APIs, billing automation, market-data tools, subscriber workflows, and research systems for a remote fintech team.
- Collaborated with product, research, and leadership stakeholders using Agile workflows, Git PRs, code reviews, Jira, and async communication.

SELECTED PROJECTS

Sage Ideas Studio: Next.js, Supabase, Stripe, 105 routes, 57 API endpoints, 38 database tables.

Nexural Research: Python/FastAPI, AI analysis workflows, 58 endpoints, 604 tests.

Nexural Automation: MCP tools, SDKs, contract tests, CI quality gates.
