

Jason Teixeira

QA Analyst | Manual Testing, Regression Testing, API Testing, Bug Reports
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

QA-focused technologist with hands-on experience testing web applications, APIs, dashboards, auth flows, billing workflows, data-heavy products, and AI-assisted systems. ISTQB certified with practical experience writing test cases, validating requirements, finding defects, documenting reproduction steps, and supporting regression testing across Agile software projects.

TECHNICAL SKILLS

Testing: manual QA, regression testing, smoke testing, exploratory testing, UAT, test cases, test plans, acceptance criteria, defect tracking, bug reports

Tools: Jira, GitHub, Playwright, pytest, browser dev tools, API testing, Postman-style workflows, CI/CD

Web/API: HTML, CSS, JavaScript, TypeScript, React, Next.js, REST APIs, FastAPI, Node.js

Data: SQL, PostgreSQL, Supabase, Excel, CSV validation, data quality checks

Process: Agile, SDLC, requirements review, documentation, stakeholder communication, root cause analysis

EXPERIENCE

QA Analyst / Full-Stack Developer | Nexural / Sage Ideas

2024-Present | Remote

- Tested production Next.js/Supabase/Stripe workflows across auth, billing, e-signature, client portal, admin dashboards, audit logs, forms, API routes, and deployment releases.
- Wrote and maintained Playwright E2E checks, API validation, smoke tests, regression checks, and release verification for customer-facing application flows.
- Documented defects with clear reproduction steps, expected results, actual results, environment notes, screenshots, and priority guidance.
- Validated AI-assisted outputs against source metrics, response quality rules, confidence scores, and deterministic system behavior before exposing results to users.
- Supported CI quality gates including dependency audits, Docker builds, test runs, schema validation, and release-readiness checks.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Tested fintech dashboards, market-data workflows, billing automations, subscriber tools, and backend API behavior used by a remote product/research team.
- Reviewed data-heavy reports and web content for accuracy, consistency, formatting, broken links, and user-facing clarity.
- Collaborated with leadership and cross-functional teammates to clarify requirements, verify fixes, and document product behavior.

SELECTED PROOF

Sage Ideas Studio: tested 105 routes, 57 API endpoints, auth, RLS, Stripe, e-signature, admin workflows, and client portal features.

Nexural Research: validated AI outputs, API behavior, 58 FastAPI endpoints, and 604-test quality suite.

Nexural Automation: contract tests, schema validation, secret scanning, CI gates, and repeatable tool-output checks.

EDUCATION & CERTIFICATIONS

B.S. Computer Science | Full Sail University

B.S. Finance | Kean University

ISTQB CTFL | ISTQB Test Automation Engineer | ISTQB CT-AI | AWS Cloud Practitioner
