

# Jason Teixeira

NOC Technician | Monitoring, Incident Triage, Networking, Cloud Operations  
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

---

## SUMMARY

Entry-level NOC and technical operations candidate with cloud, networking, application monitoring, incident triage, documentation, and troubleshooting experience. Strong fit for NOC Technician, Junior Systems Operator, Network Operations Technician, and technical monitoring roles.

---

## SKILLS

**Operations:** monitoring, alert triage, incident notes, escalation, uptime checks, release smoke checks, operational runbooks

**Networking/Cloud:** Cisco networking basics, AWS fundamentals, DNS basics, HTTP, APIs, Vercel deployments, Docker basics

**Technical:** Linux/terminal basics, GitHub, CI/CD, logs, browser dev tools, SQL basics, REST APIs

**Process:** documentation, root cause notes, ticket updates, stakeholder communication, QA validation

---

## EXPERIENCE

### Technical Operations / Developer | Sage Ideas

2024-Present | Remote

- Monitored and validated production deployments, API routes, serverless workflows, auth flows, email behavior, Stripe events, and application smoke checks.
- Troubleshoot deployment, environment, routing, API, browser, and data issues across Vercel, Supabase/Postgres, GitHub Actions, and application logs.
- Created runbooks, release checks, incident-style notes, and QA validation steps for production workflows.
- Supported Docker builds, dependency audits, CI checks, secret scanning, and release-readiness gates.

### Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Supported market-data workflows, dashboards, billing automations, research systems, and internal fintech operations.
- Communicated technical status, issues, and updates clearly in a remote team environment.

---

## SELECTED PROOF

**Sage Ideas Studio:** deployment checks, API route validation, auth flow monitoring, Stripe workflow checks, production smoke tests.

**Nexural Research:** Docker/Kubernetes packaging, FastAPI services, release validation, API quality checks, and CI gates.

**Nexural Automation:** operational runbooks, contract tests, schema validation, dependency audits, and secret scanning.

---
