SUMMARY

QA automation engineer with hands-on experience building automated checks for web apps, APIs, AI workflows, auth, billing, dashboards, and data-heavy systems. Strong fit for junior or associate QA automation roles requiring Playwright, pytest, regression testing, API validation, CI/CD, bug documentation, and practical engineering judgment.

TECHNICAL SKILLS

Automation: Playwright, pytest, test automation, regression suites, smoke tests, E2E tests, contract tests, API testing

Languages: Python, TypeScript, JavaScript, SQL

Web/API: React, Next.js, FastAPI, Node.js, REST APIs, WebSocket, browser dev tools

CI/CD: GitHub Actions, Docker, Vercel, dependency audits, release gates, test reports

QA Process: test plans, test cases, acceptance criteria, Jira, defect tracking, exploratory testing, UAT

EXPERIENCE

QA Automation Engineer / Developer | Nexural / Sage Ideas

2024-Present | Remote

- Built Playwright E2E coverage for production web workflows including auth, forms, portal navigation, admin screens, billing flows, and deployment smoke checks.
- Built API and contract validation for FastAPI and Next.js routes, including schema checks, deterministic response checks, and regression coverage for user-facing workflows.
- Maintained CI gates covering tests, dependency audits, Docker builds, secret scanning, and release checks for automation-heavy projects.
- Built Nexural Research with 58 FastAPI endpoints, 604 tests, 93% reported coverage, AI response validation, Docker/Kubernetes packaging, and repeatable quality checks.
- Built Nexural Automation with MCP tools, golden fixtures, contract tests, schema validation, and repeatable tool outputs.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Tested and supported fintech dashboards, research workflows, billing automation, market data ingestion, subscriber tools, and internal APIs.
- Used Git workflows, code reviews, Jira, async collaboration, and release validation in a remote Agile team.

SELECTED PROJECTS

Nexural Research: pytest, FastAPI, AI output validation, 604 tests, API quality gates.

Sage Ideas Studio: Playwright, auth/RLS checks, Stripe workflows, client portal tests, Vercel deployments.

Nexural Automation: MCP contract tests, schema validation, CI quality gates, secret scanning.

EDUCATION & CERTIFICATIONS

B.S. Computer Science | Full Sail University

B.S. Finance | Kean University

ISTQB CTFL | ISTQB Test Automation Engineer | ISTQB CT-AI | AWS Cloud Practitioner
