

Jason Teixeira

Technical Support Engineer | SaaS, APIs, Troubleshooting, Customer Workflows
Orlando, FL | Remote | (908) 937-6568 | nexuraltrading@gmail.com

sageideas.dev | github.com/JasonTeixeira | linkedin.com/in/jason-teixeira

SUMMARY

Technical support engineer with hands-on experience debugging SaaS workflows, APIs, auth, billing, dashboards, data issues, browser behavior, and deployment problems. Strong fit for entry-level or associate support engineering roles requiring customer communication, troubleshooting, documentation, escalation, SQL/API familiarity, and product-minded problem solving.

TECHNICAL SKILLS

Support: troubleshooting, root cause analysis, ticket triage, customer communication, escalation, documentation, knowledge base articles

SaaS Workflows: auth, billing, Stripe, portals, admin dashboards, forms, notifications, API integrations

Technical: JavaScript, TypeScript, Python, SQL, REST APIs, browser dev tools, logs, GitHub, Vercel, Supabase/Postgres

Process: Jira, Agile, incident notes, repro steps, QA validation, release verification, stakeholder updates

EXPERIENCE

Technical Support Engineer / Full-Stack Developer | Sage Ideas

2024-Present | Remote

- Built and debugged production SaaS workflows across auth, billing, e-signature, client portals, admin dashboards, email notifications, forms, and API routes.
- Investigated issues using browser dev tools, logs, database records, API responses, reproduction steps, and user workflow review.
- Created implementation notes, support documentation, runbooks, release checks, and troubleshooting guidance for production application workflows.
- Validated customer-facing fixes through smoke tests, regression checks, API checks, and documented acceptance criteria.
- Supported Stripe, Supabase, Vercel, GitHub Actions, auth/RLS, and email workflow issues across a production Next.js application.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Supported fintech dashboards, subscriber workflows, billing automations, market-data tools, research content, and internal product operations.
- Communicated technical issues clearly to non-technical stakeholders and helped translate user needs into product fixes.

SELECTED PROOF

Sage Ideas Studio: 105 routes, 57 API endpoints, 38 database tables, Stripe, auth, RLS, client portal, admin workflows.

Nexural Research: FastAPI workflows, AI provider integrations, API validation, export/report workflows.

HighStrike: market dashboards, user subscriptions, billing automation, research operations.
