EXPERIENCE

Technical Writer / Developer | Sage Ideas / Nexural

2024-Present | Remote

- Wrote implementation notes, product documentation, troubleshooting guides, QA checklists, runbooks, and technical explanations for SaaS and AI workflows.
- Documented API-backed features, auth, billing, client portal workflows, admin tools, AI response validation, MCP automation, and deployment behavior.
- Converted complex technical systems into clear user-facing and developer-facing documentation.
- Created project READMEs, installation notes, quality gates, workflow descriptions, and support handoff materials.

Senior Analyst & Full-Stack Developer | HighStrike

2021-2026 | Remote

- Authored 200+ pages of financial analysis, investment research, technical documentation, user-facing reports, and market explanations.
- Translated complex financial and software workflows into clear content for technical and non-technical audiences.

SELECTED PROOF

HighStrike: 200+ pages of financial analysis, user-facing research, technical documentation, and market explanations.

Nexural Automation: README docs, installation notes, workflow descriptions, quality gates, validation logic, and tool behavior.

Sage Ideas Studio: product documentation, support notes, runbooks, implementation guides, release checks, and troubleshooting docs.
